

Overview of the Flash Glucose Monitoring Workshop:

The purpose of these workshops is to give Diabetes Educators the experience of wearing a Flash Glucose Monitoring System so that it will help in understanding this exciting technology. Along with wearing the sensor for up to 14 days, the practical workshop will include how to set up the reader and apply the sensor as well as how to get the best use from the data by the Ambulatory Glucose Profile reports (AGP). The sessions will be held with the support of a Credentialed Diabetes Educator with experience with Flash Glucose Monitors who will share their stories, which indicate, with the support of a health care professional, people have a better experience and understanding of the device and software.

AGENDA

Time (minutes)	Session	Presenter/s
5	Opening and Introduction	CDE
20	Product Overview <ul style="list-style-type: none">• What is Flash Glucose Monitoring?• Accuracy / Interferences/ MARD• ISF vs BGM (video)• Indication for Use• Product Features and Benefits• The evidence- what the trials tell	Abbott Diabetes Care
45	Practical Workshop <ul style="list-style-type: none">• Setting up the Reader• Applying the sensor• Starting the sensor• Checking Glucose• Common Screens• Messages and Notifications• Settings on the Reader	CDE Abbott Diabetes Care
20	Software and Reports <ul style="list-style-type: none">• Introduction to AGP• eA1c• Reports• What's coming?	Abbott Diabetes Care
10	Local Case Studies	CDE
5	Group Scan	CDE
5	Questions	CDE and Abbott Diabetes Care
